

# Scientists Lock Up Evidence

Scientists are re-evaluating their long-held beliefs now that new hard evidence has been discovered and is locked up in a high security facility. For decades, the scientific community has debated whether or not it was possible to create a diamond blade that provided BOTH longer life AND faster cutting speed. Conventional wisdom said "no," but then the ARIX diamond blade was discovered. The alien guarding the blade had no comment (he doesn't have a mouth).

Dan Steiner, President of DITEQ, Diamond Tools and Equipment explained the phenomenon: "Over the past 35 years, I've seen a lot of companies try to find a way to precisely place individual diamonds throughout segments to maximize their efficiency. It would change everything. All the old formulas for projecting costs would go out the window. That day is here now. DITEQ has done it with its ARIX technology diamond blades. It's a very exciting time."

# Loch Ness Reveals Its Secret

The Loch Ness monster came out in broad daylight to reveal her secret to a group of tourists. The tourists were astonished to see her carrying the mythical diamond blade that scientists have been pursuing for decades. According to the myth, the diamond blade can deliver BOTH longer life AND faster cutting speeds - something thought to be impossible in many scientific circles. Nessy took the time to sign a few autographs and tell on-lookers her source for the ARIX diamond blade is actually DITEQ.

Dan Steiner, President of DITEQ, Diamond Tools and Equipment explained the phenomenon: "Nessy did the world a favor by bringing this to light. When you look at the ARIX blade, you can see each individual diamond is precisely placed throughout the segment to provide unheard-of performance. Throw out all the old quoting formulas. This changes everything!"

# Mythical Legend Caught on Video

*Scientist Proclaim:  
"This changes everything."*

Scientists and engineers have to re-think long-held positions after new digital image-enhancing technologies reveal an astounding scientific breakthrough. Close examination of the Patterson film reveals that Big Foot is carrying a diamond blade previously thought to be a myth prior to this evidence. The diamond blade is said to provide BOTH longer life AND faster cutting speeds - something that flies in the face of existing scientific theory.

Dan Steiner, President of DITEQ Diamond Tools and Equipment, explains the phenomenon: "Over the 30 years I've been in this business, I've heard a lot of speculation about what would happen if you could precisely arrange individual diamonds throughout segments to maximize their efficiency. A lot of people have put immense efforts into trying to catch this elusive creature. We happened to pull it off, and now we are ready to share it with the world. It's a very exciting time!"

*New digital image-enhancing technologies reveal Big Foot carrying an ARIX diamond blade in his right hand.*
